IMPORTANT SAFETY INFORMATION AND INSTRUCTIONS

TO AVOID DROWNING, PARALYSIS OR OTHER SERIOUS INJURY READ AND FOLLOW THE BASIC SAFETY RULES LISTED ON THE REVERSE SIDE.

DO NOT OVER INFLATE!

INFLATING

1. Locate a clean area free of stones or other sharp objects.
2. Unroll the product so it is laid out flat with head facing up.
3. Use a hand or foot operated air pump to inflate the product.
4. Inflate each section of the product slowly to about 90% of its capacity.

NOTE: Inflate in the order of: 1. Main body (quick fill valve) 2. Inner seating area (standard valve) 3. Head (standard valve)

5. Finish inflating each section slowly until it is firm to the touch but NOT hard.

IMPORTANT: Air temperature and weather condition do affect the internal air pressure of inflatable products. In cold weather, the product will lose some pressure due to the fact that the air will contract. If this occurs, you may want to add a little air to the product. However, in hot weather, the air will expand. You must let some air out to prevent the product from failing due to overpressure.

Wipe dry with a soft cloth after use. When the product is out of water, it should be cleaned and dried thoroughly and stored in a cool, dry place.
