

Mineral Harmony™

QUATRO

Mineral Purifier

DIRECTIONS FOR USE:

Start-Up: Using an accurate test method, balance spa water before installing the Quatro Mineral Purifier.

pH:	7.2 – 7.6
Alkalinity:	80-120 ppm
Calcium Hardness:	200-400 ppm

Install the Mineral Purifier in the filter. Add 1-1/2 tablespoons (3/4 oz) of Mineral Harmony Sanitizer per 250 gallons of water.

After Each Use: Add 2 ounces (4 tablespoons) of Mineral Harmony Refresh per 300 gallons of water.

As Needed: The Quatro Mineral Purifier reduces the amount of chemical sanitizer needed. Maintain Chlorine levels at .05 - 1.0 ppm instead of 3 - 5 ppm.

Once per Week: Test pH, Alkalinity and Hardness levels. Adjust as needed.

Every 4 Months: Drain and re-fill the spa. Follow Start-Up instructions above. Insert a new Quatro Mineral Purifier.

Note: If placing the Mineral Purifier inside the filter, one or two extenders may be used to keep the purifier from dropping to far into the filter and impeding water flow. To properly attach, line up the notch with the opening.

FIRST AID

If ingested, immediately call the Poison Control Center or a doctor for treatment advice.

STORAGE/DISPOSAL

Store in areas inaccessible to small children. Dispose of cartridge in trash after four months of use. Do not save or re-use. In the event a cartridge is compromised, remove the cartridge and vacuum any remaining particles from the spa water.

Item #2730

Manufactured for:
Essentials-SpaSupplies.com
Cumming, GA 30041
©2018 Essentials

Active Ingredient:Silver Nitrate 1%

Other Ingredients:99%

Spa Capacity: Maximum 500 Gallons

Net Contents: 4 ounces

CAUTION

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS

Hazardous to humans and domestic animals. In the event that a cartridge is compromised, minerals should not be ingested as they can cause gastric distress.
