

Mineral Harmony®

NO PHOS

Phosphate Removal Treatment

CAUTION

KEEP OUT OF REACH OF CHILDREN

Net Weight: 16 oz.

Mineral treated spas require the regular testing and balancing of the water for the minerals to perform properly. Mineral Harmony was developed exclusively for use with mineral treated spa water.

Mineral Harmony NO PHOS is an advanced fast-acting formula designed to remove phosphates from spa water. High phosphate levels provide an environment for algae, requiring higher amounts of sanitizer to control algae growth. Recommended phosphate levels should be below 125 PPB.

DIRECTIONS FOR USE:

Maintenance: To keep phosphates low, add 1 oz. per 500 gallons of **NO PHOS** once a week.

1. For phosphate levels of 1,000 PPB or more, add **NO PHOS** per the following chart:

Gallons of Water	Phosphate Level		
	1000 PPS	2000 PPS	4000 PPS
250	2 oz.	4 oz.	8 oz.
500	4 oz.	8 oz.	16 oz.
1,000	8 oz.	16 oz.	32 oz.

2. After adding **NO PHOS**, immediately add 2 ounces of **Mineral Harmony SPARKLE** to clarify the spa water of any white or cloudy effect from the treatment. Run filter for two hours. The following day, test for phosphates again and make any additional adjustments.

3. Clean the filter cartridge when treatment is complete.
