

SWIM+SPA BOOST

Increases Water Hardness

CAUTION

KEEP OUT OF REACH OF CHILDREN

See side panel for additional
precautionary statements.

Net Weight: 32 oz.

Mineral treated water requires the regular testing and balancing of the water for the minerals to perform properly. Mineral Harmony was developed exclusively for use with mineral treated Swim+Spa water.

Water hardness describes the total amount of calcium in spa water. **Swim+Spa BOOST** brings water hardness into the proper range. Low hardness can result in corrosion of equipment and spa surfaces. The ideal hardness level is 150- 400 parts per million (ppm).

DIRECTIONS FOR USE: SHAKE WELL

1. Test water hardness.
2. If calcium level is too low, with jets on add **Swim+Spa BOOST**.

Gallons of Water	Increase in PPM Required			
	7 ppm	14 ppm	21 ppm	28 ppm
250 gallons	1/2 oz.	1 oz.	1-1/2 oz.	2 oz.
500 gallons	1 oz.	2 oz.	3 oz.	4 oz.
1000 gallons	2 oz.	4 oz.	6 oz.	8 oz.

3. Run jets continuously for 30 minutes and retest water. If hardness is not in the proper range, repeat above until in the desired range.
