

Mineral Harmony™

# LOWER

Decreases pH and Alkalinity

## **DIRECTIONS FOR USE:**

### **Mineral Harmony LOWER**

should be used as necessary when pH levels are above 7.8.

## **NOTE:**

For best results, dissolve granular products first by adding to a small container of water. Then add the product to the spa water.

1. Make sure all equipment is OFF.
2. Add ¼ oz. (1-1/2 tsp.) of **LOWER** for every 500 gallons of spa water.
3. Turn ON circulation system for 30 minutes.
4. Retest water. If pH is still above 7.8, repeat steps 1-3.
